

Updating you on the world's best Science

FSHD Global Research Organisation recently hosted several leading doctors from across the globe to share with us in layman terms, their individual research and latest ground-breaking breakthroughs and interesting facts to audiences across several states.

An important and relevant website was highly recommended by Dr Rabi Tawil for those that were interested in the evaluation, diagnosis and management of FSHD, [click here to read more](#).

Our small team was delighted with the turnout and the opportunity to meet so many new faces. It was particularly gratifying to meet other Australian-based doctors who were in the "mix" of the attendees because as we know, FSHD is commonly misdiagnosed by the medical profession.

For those of you who were unable to join us, we have uploaded key presentations to our YouTube channel FSHD Global as seen below.

We are sure you would agree that the research into the field of FSHD is moving quickly which is exciting for us all.

Welcoming Justin Reid as Patron

We are delighted to welcome a remarkable man, Justin Reid as he joins the Foundation as Patron, joining celebrities Luke Mangan and Jamie Durie OAM. Despite being affected with FSHD at a younger age Justin has an incredible outlook on life, adapting to every situation and challenges he has faced.

Justin is a true inspiration to every person he meets. After many years of volunteering, fundraising and being a guest speaker for the Foundation, we are proud and truly delighted to have this man with such a beautiful soul to be honoured as a Patron.

"I'm honoured to be a Patron of FSHD Global Research Foundation. I have a background in Social Work and believe passionately in the power of the human spirit to overcome adversity. I'm thrilled to be part of the Foundation's team and the exciting times ahead."
Justin Reid

AJ Gallagher Golf Day

We would like to thank AJ Gallagher for hosting their Corporate Golf Day in support of raising awareness and funds for the Monica Ellis Children's Medical Research Grant.

The Tournament was successful in raising nearly \$14,000 through the generosity and support of all those who attended. After hearing Darryl and Julie Ellis speak of Monica and her journey, an incredible energy and awareness of the importance of research into Infantile FSHD filled the room.

This day would not have been possible without CEO Andrew Godden, Peter Kelly and the wonderful team from AJ Gallagher pulling together what was an incredible day for all involved.

Stem Cell Person of the Year

Congratulations to Bill Moss AO for his recent nomination for Stem Cell Person of the Year 2015 through stem cell expert Paul Knoepfler's leading blog.

On behalf of the Foundation and everyone in our community we would like to congratulate Bill on becoming one of the finalists in this competition which will be announced in the coming weeks. Thank you to all of those who voted.
